BIRD SCARING LASER

Precision engineered laser technology

The ultimate SILENT bird scarer

- Silent and highly effective against most species.
- Clear large areas in minutes.
- Tests have shown that repeated use over 3 to 10 days will substantially reduce or eliminate the target species. Occasional follow-up may be required to maintain deterrent effect.
- Perfect close to built-up areas where noise complaints can be an issue.

Where to use:

- | | |
|-----------------------------|--------------------|
| ✓ Livestock buildings | ✓ Industrial |
| ✓ Crops and fields | ✓ Landfill sites |
| ✓ Agricultural grain stores | ✓ Recycling plants |
| ✓ Fisheries and fish farms | ✓ Airports |

The **LASERSTRIKE** has been specifically developed for use as a safe, effective birdscaring tool and uses high quality precision lenses and components.

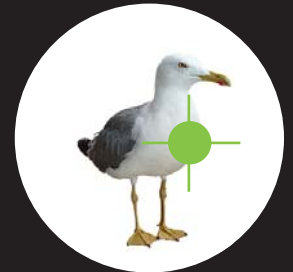

LASERSTRIKE is designed to scare and clear birds at close range and at distances of up to 600m. It is most effective when used in low light conditions (ie winter) and at dawn and dusk when the birds are most active.

LASERSTRIKE IS MANUFACTURED FOR PROFESSIONAL USE ONLY not to be confused with cheap, inferior lasers that have low beam quality, are ineffective and can be potentially dangerous.
