ORIGINAL COWCLOG

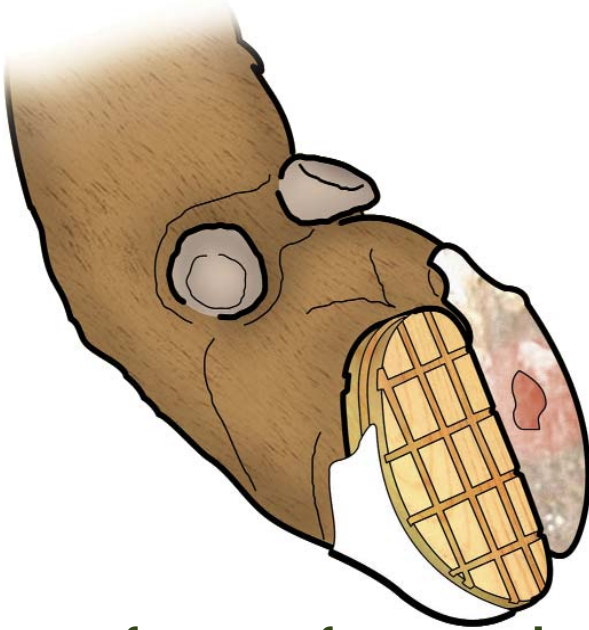

10 Hoof treatments

Original Cow Clogs

The Original Cow Clog - proven performance over the years has made this one of the best selling treatments for lameness.

Hoof support for a speedy recovery from lameness!

The Original Cow Clog pack consists of adhesive and wooden blocks (clogs).

The adhesive has two pre-measured components making mixing simple. Once the adhesive is mixed and applied to the cow's claw, the clog is placed into position and the adhesive is moulded into a 'boot' around the block and cow's claw.

A chemical reaction takes place hardening the adhesive and securing the wooden block to the cow's claw.
